Executive Summary

WORKPLAN FOR WP2 2.1

Considering T2.1.1 in more detail:

- ENSC prepares a data collection sheet: See below.
- The data sheet is then completed by each partner [before July 10] and returned to ENSC for collation and analysis [July 10-22]. This analysis will aim to ensure all relevant areas receive appropriate coverage and no duplication exists across the partners
- The results of T2.1.1 will enable work in T2.1.2, to define the overall scope of the work (research question, to be discussed further during meetings)

While the partners are completing the template, ENSC prepares the table of contents for D2.1. This will show all partners how the data being collected will fit together and show where their inputs are required. It will be available on the wiki.

Acknowledgement

The HELENA project (SIS8-CT-2009-230376) is co-funded by the European Commission, through its Seventh Framework Programme (FP7) under 'Capacities'.

The authors wish to acknowledge the Commission for their support of the project, the efforts of the partners and the contributions of all those involved in HELENA project.
